1.4 PIANI IN STRATIFICATO HPL SP. 1 - 2 - 4 - 6 cm

HPL stratified worktops th. 1 - 2 - 4 - 6 cm - *Plans de travail stratifiés HPL ép. 1 - 2 - 4 - 6 cm*

Lo stratificato HPL è un laminato ad alto spessore (10 mm) costituito internamente da strati di fibre cellulosiche impregnate con delle resine fenoliche, mentre gli strati esterni sono impregnati con resine termoidurenti. Il tutto subisce la policondensazione delle resine con una forte pressione (9 Mpa) abbinata al calore 150° durante la pressatura. Il proprio interno può essere realizzato in due versioni: il Nucleo Nero e il Full color. Il primo è formato con strati di cellulosa di colore scuro (nero o marrone a seconda del decorativo esterno) mentre il secondo è composto da strati di primissima scelta dello stesso colore o comunque del colore dominante del decorativo superficiale.

HPL Stratified is a laminated with a high thick (10 mm) internally made with cellulose fibres imbued with phenolic resins and externally with thermosetting plastics.

All these materials through a high pressure (9 Mpa), heat 150° and Full Color give the way to resin polycondensation. The first is made with a dark cellulose layer (black/brown it depends from external colour), while the second is made with first choice layers with the same colour or dominant colour of surface.

Le stratifié HPL est un laminé avec un grand épaisseur (10 mm) composé à l'intérieur par des couches en cellulose trempé avec des résines phénoliques et à l'extérieur par des résines thermodurcissables.

L'ensemble des éléments à travers une forte pression, le chaleur 150° et le Full Color donne le feu vert à la polycondensation. Le premier est composé par des couches en cellulose foncés (noir/marron selon la finition extérieur), tandis que le second est composé par des couches de première choix du même couleur ou du couleur dominant de la surface.

1.7 PIANI IN COSMOLITE®

COSMOLITE® worktops - *Plans de travail COSMOLITE®*

COSMOLITE
MATERIA NUOVA

Cosmolite® è la soluzione perfetta per il kitchentop ecosostenibile.

La sua composizione è interamente realizzata utilizzando una miscela di minerali provenienti dall'industria dell'estrazione della pietra e resina proveniente per il 21% da fonti vegetali.

Un materiale nuovo con materie prime diverse dal quarzo generato attraverso pratiche produttive innovative e rispettose dell'uomo e dell'ambiente.

Una superficie pratica che garantisce elevati standard di igiene e sicurezza al contatto con alimenti.

Con una base saldamente radicata nella sostenibilità, Cosmolite® è un potente segno dell'impegno verso l'innovazione e l'ambiente.

Questa superficie sostenibile risponde alla richiesta tangibile del mercato di materiali ecologici nuovi e di qualità, che rispettano gli standard ambientali attuali e si avvicinano con un'estetica unica.

Cosmolite®: dove l'innovazione abbraccia l'ambiente.

Per maggiori informazioni vai su: www.cosmolite.com

Cosmolite® is the perfect solution for eco-friendly kitchentops.

Its composition is entirely made using a mixture of minerals from the stone mining industry and resin coming 21% from plant sources.

A new material with raw materials other than quartz and generated through innovative production practices that respect man and the environment.

A practical surface that guarantees high standards of hygiene and safety upon contact with food.

With a foundation firmly rooted in sustainability, Cosmolite® is a powerful sign of commitment to innovation and the environment.

This sustainable surface responds to the market's tangible demand for new and quality eco-friendly materials that meet current environmental standards and that are proposed with a unique aesthetic.

Cosmolite®: where innovation embraces the environment.

For further informations go to: www.cosmolite.com

Cosmolite® est la solution parfaite pour le plan de travail écologique.

Sa composition est entièrement réalisée en utilisant un mélange de minéraux provenant de l'industrie de l'extraction de la pierre et de résine provenant à 21% de sources végétales.

Un nouveau matériau avec des matières premières autres que le quartz, généré par des pratiques de production innovantes et respectueuses de l'homme et de l'environnement.

Une surface pratique qui garantit des standards élevés d'hygiène et de sécurité au contact avec les aliments.

Avec une base solidement enracinée dans le développement durable, Cosmolite® est un signe puissant de l'engagement envers l'innovation et l'environnement.

Cette surface durable répond à la demande tangible du marché pour des matériaux écologiques nouveaux et de qualité, qui respectent les normes environnementales actuelles et s'approchent avec une esthétique unique.

Cosmolite® : où l'innovation embrasse l'environnement.

Pour plus d'informations, visitez le site : www.cosmolite.com

La finitura opaca è una finitura meccanica che si esegue sul prodotto Cosmolite®, ottenuta mediante l'utilizzo di spazzole diamantate

I minerali di Cosmolite® essendo riciclati non sono omogenei e costanti e possono avere caratteristiche di durezza differenti.

L'azione delle spazzole sui minerali di diversa durezza può determinare avvallamenti sulla superficie in quantità, profondità e dimensioni variabili.

Queste caratteristiche sono distintive del prodotto e non rappresentano un difetto.

Questa finitura conferisce al materiale una superficie opaca.

The matte finish is a mechanical finish that is performed on the Cosmolite® product and obtained through the use of diamond brushes.

Cosmolite® minerals, being recycled, are not homogeneous and constant and can have different hardness characteristics.

The action of the brushes on minerals of different hardness can cause depressions on the surface in varying quantities, depths and sizes.

These characteristics are distinctive of the product and do not represent a defect.

This finish gives the material a matte surface.

La finition mate est une finition mécanique réalisée sur le produit Cosmolite®, obtenue à l'aide de brosses diamantées

Les minéraux de Cosmolite® étant recyclés ne sont pas homogènes et constants et peuvent avoir des caractéristiques de dureté différentes.

L'action des brosses sur les minéraux de différente dureté peut causer des creux sur la surface en quantité, profondeur et taille variables.

Ces caractéristiques sont distinctives du produit et ne représentent pas un défaut.

Cette finition donne au matériau une surface opaque.

I piani hanno uno spessore di 2 cm e una profondità di 64 cm e sono trattati con antimacchia.

Le alzatine hanno un'altezza di 6 cm e spessore di 2 cm.

Worktops are 2 cm thick and 64 cm deep, with anti-stain finish.

Splashbacks are 6 cm high and 2 cm thick.

Les plans de travail ont une épaisseur de 2 cm, une profondeur de 64 cm et reçoivent un traitement anti-coloration.

Les rehausses ont une hauteur de 6 cm et une épaisseur de 2 cm.

LAVORAZIONI PROFILI PER PIANO

Edges for plain worktops - *Chant du plan de travail*

= TEXTURE

La finitura lucida è una finitura fatta a macchina post cottura del materiale, pertanto è più soggetta allo striscio, possibile assorbimento ed attacco agli acidi. Inoltre in controluce è normale vedere la riflessione vibrata tipica della finitura eseguita a macchina su questo tipo di superfici.

The polished finish is a machine-made finish done after firing the material, therefore it is more prone to scratches, to the possible absorption of liquids and to be damaged by acids. Furthermore, when backlit it is normal to see the vibrated reflection typical of the mechanical process on this type of surface.

La finition brillante est une finition faite à la machine après la cuisson du matériau, elle est donc plus sujette aux risques de frottement, d'absorption de liquides et substances acides. A contre-jour, il est normal de voir la réflexion vibratoire typique de la finition réalisée par la machine sur ce type de surfaces.

1.10 PIANI IN GRES INALCO®

INALCO® gres worktops - *Plans de travail en GRES INALCO®*

Nasce da un processo produttivo all'avanguardia, frutto di una ricerca che tende a soluzioni estetiche sempre nuove. Una miscela di materie prime naturali che viene macinata a umido, trasformata in granulato e compattata prima di essere sintetizzata a 1300° in forni ibridi e infine rifilata.

Resistente agli attacchi chimici, all'usura, al fuoco ed ai graffi; igienico, antibatterico, riciclabile e di facile pulizia.

Per maggiori informazioni vai su: www.inalco.global

It is born from a cutting-edge production process, the result of research looking at always new aesthetic solutions. A wet-ground mixture of natural raw materials is transformed into granules and compacted before being synthesized at 1300 ° in hybrid ovens and finally trimmed.

Resistant to chemical attacks, wear, fire and scratches; hygienic, antibacterial, recyclable and easy to clean.

For further informations go to: www.inalco.global

Il est né d'un processus de production de pointe, fruit d'une recherche tendant à des solutions esthétiques toujours nouvelles. Un mélange de matières premières naturelles qui est moulu à l'humidité, transformé en granulés et compacté avant d'être synthétisé à 1300° dans des fours hybrides et finalement coupé.

Résistant aux attaques chimiques, à l'usure, au feu et aux rayures; hygiénique, antibactérien, recyclable et facile à nettoyer.

Pour plus d'informations, visitez le site: www.inalco.global

1.11 PIANI IN GRES LAMINAM®

LAMINAM® gres worktops - Plans de travail en gres LAMINAM®

Gres porcellanato è un materiale naturale cotto a 1100°C che tramite lavorazioni all'avanguardia gli consente di avere, oltre ad un'estetica pregiatissima, anche una notevole resistenza ai graffi, ai liquidi in genere, al calore e gli agenti chimici.

Ciò nonostante è bene seguire con attenzione quanto riportato di seguito al fine di mantenere inalterate le caratteristiche di questo materiale.

Per la normale pulizia è sufficiente un panno morbido inumidito con acqua e detersivi neutri, per le macchie più ostinate è possibile utilizzare detersivi a reazione acida.

Evitare l'utilizzo di alcool denaturato puro in quanto potrebbe lasciare degli aloni, evitare inoltre l'impiego di prodotti altamente basici come la soda caustica, ammoniaca ecc....

Non appoggiare pentole calde direttamente sulla superficie e fare attenzione a non far sporgere l'invase di pentole, bistecchiere o padelle durante la cottura che potrebbero deviare la fiamma verso la superficie del top.

Si sconsiglia in ogni caso l'utilizzo di utensili affilati o appuntiti direttamente sulla superficie.

Per maggiori informazioni vai su: www.laminam.com

Porcelain gres is a natural material and fired at 1,100°C that, thanks to its cutting-edge workmanship, makes it possible to achieve very precious aesthetics and remarkable resistance to scratches, to liquids in general, to heat and to chemical agents.

Nevertheless, to preserve the features of this material it is best to carefully follow the instructions given hereafter.

For normal cleaning purposes use a soft cloth with water and neutral detergents; for stubborn stains you can use acid-reacting detergents.

Avoid using pure denatured alcohol because it may leave marks; also avoid using very basic products such as caustic soda, ammonia, etc.

Do not place hot pots and pans directly on the surface and make sure pots, grills and pans do not exceed the edge of the hob during the cooking process as this may divert the flame towards the surface of the top.

Never use sharp or pointed utensils directly on the surface.

For further informations go to: www.laminam.com

Le GRES cérame est un matériau naturel cuit à 1100°C, grâce à des fabrications de pointe, il peut également avoir, en plus d'une esthétique très recherchée, aussi une résistance considérable aux égratignures, liquides, chaleur et agents chimiques.

Cependant, c'est conseillé de suivre soigneusement les conseils ci-dessous pour bien préserver les caractéristiques de ce matériau.

Pour une normal nettoyage, c'est suffisant un chiffon doux humidifié avec de l'eau et des détergents neutres, pour les taches les plus hostiles vous pouvez utiliser des détergents à réaction acide.

Ne pas utiliser de l'alcool dénaturé, puisqu'il pourrait laisser des halos, à éviter aussi l'usage des produits basilaire comme la soude caustique, l'ammoniaque, etc.

Ne pas poser des casseroles chaudes sur la surface et prêter attention à ne pas faire sortir le contenant des casseroles, poêles et grils pendant le cuisson, puisqu'ils pourraient dévier la flamme vers la surface du plan de travail.

En tous cas, ce n'est pas recommandé l'usage des outils affilés et nets dans la surface du plain de travail.

Pour plus d'informations, visitez le site: www.laminam.com

Alla data di stampa di questo listino, Febbraio 2026, solo le finiture Pietra Piasentina Taupè, Pietra di Cardoso Nero, Pietra Piasentina Grigio e Porfido Marrone Naturale sono prodotte con la tecnologia IN_SIDE di LAMINAM con continuità materica tra massa, superficie e bordo.

Per conoscere la gamma IN_SIDE aggiornata contattare l'ufficio vendite o consultare il sito www.laminam.com

At the printing date to this price list, February 2026, only Pietra Piasentina Taupè, Pietra di Cardoso Nero, Pietra Piasentina Grigio and Porfido Marrone Naturale finishes are produced with technology IN_SIDE of LAMINAM with a texture continuity between masse, surface and edge.

- 1 - La merce viaggia a rischio e pericolo dell'acquirente anche se venduta franco destino.
- 2 - Eventuali difformità riscontrate tra la fornitura e l'ordine, nonché eventuali vizi o difetti dei prodotti consegnati, devono essere segnalati per iscritto a mezzo raccomandata, entro 8 giorni dal ricevimento della merce o, in ogni caso, entro 8 giorni dalla scoperta di vizi occulti; in questo caso, le contestazioni non potranno essere accettate se trascorsi 2 anni dalla data di consegna. Eventuali danni imputabili al trasporto dovranno essere evidenziati sul documento di trasporto al momento della consegna.
- 3 - I termini di consegna assumono per la Fornitrice valore puramente indicativo e non vincolante. Nessun danno diretto od indiretto può essere richiesto per mancata o ritardata esecuzione.
- 4 - La merce ordinata non può più essere annullata e/o respinta alla consegna.
- 5 - È facoltà dell'azienda produttrice accettare ed evadere la proposta d'ordine.
- 6 - La conformità del campione, sia alla prima che alle successive forniture, non deve intendersi in senso tassativo giacché, possono sussistere margini di tolleranza sia per quanto attiene ai colori, che ai materiali, che alle misure.
- 7 - La garanzia è limitata ai prodotti fabbricati integralmente dalla Fornitrice che declina ogni responsabilità negli altri casi come: cattiva od errata installazione, danni causati da irregolare collocamento e funzionamento di impianti elettrici, gas, idraulici; difetti e danni causati da elettrodomestici per i quali il Committente farà valere i certificati di garanzia delle case costruttrici.
- 8 - Le apparecchiature, o gli accessori impiegati nel corso delle forniture saranno, solo per quanto possibile, conformi ai campioni. Quando, per garantirsi gli approvvigionamenti, l'azienda fosse costretta ad indirizzare verso altri fornitori l'acquisto di altri componenti, questi potranno risultare diversi anche se saranno sostanzialmente rispettate le caratteristiche qualitative e funzionali dei prodotti.
- 9 - Non si accettano resi di merce se non autorizzati dalla ditta SIGI s.r.l.
I resi accettati dalla costruttrice, vengono accreditati allo stesso prezzo di fattura da voi pagato al momento dell'acquisto, addebitandovi eventuali parti deprezzate o da voi danneggiate.
- 10 - Anche nel caso di contestazione, i pagamenti non possono essere sospesi. Il ritardo di pagamento, anche di una sola rata, autorizza la ditta Fornitrice a chiedere l'integrale pagamento con l'addebito degli interessi di mora applicati al tasso bancario vigente, più l'addebito delle spese bancarie e del costo di gestione dell'insoluto. Inoltre non potranno essere evasi nuovi ordini fino al saldo degli insoluti.
- 11 - La merce consegnata rimane di proprietà della ditta Fornitrice sino al pagamento totale da parte del Committente.
A sua volta la Fornitrice ha facoltà di ritirarla nel caso che non venisse effettuato il saldo totale.
- 12 - Si riconoscono validi soltanto i pagamenti effettuati direttamente alla Fornitrice o ad un incaricato munito di regolare autorizzazione.
- 13 - Eventuali pezzi su misura saranno presi in considerazione solo in caso di ordine scritto accompagnato da chiaro schizzo di realizzazione e saranno vagliati prima di essere accettati. Il costo sarà effettuato a consuntivo.
Resta inteso che per tali elementi su misura non sarà mai, dalla ditta SIGI s.r.l., accettato il reso.
- 14 - La SIGI s.r.l. è sollevata da qualsiasi responsabilità, per danni causati a cose o persone, da insatallazioni o errati montaggi dei propri prodotti effettuati da terzi.
- 15 - La Fornitrice declina ogni responsabilità per eventuali inesattezze di stampa o per errate indicazioni sulle caratteristiche che non sono sostanziali nel prodotto.
- 16 - L'azienda si riserva di introdurre senza preavviso eventuali modifiche tecnico/costruttive sul prodotto e sulle composizioni presentate.
- 17 - I prezzi del seguente listino sono espressi in Euro, IVA esclusa.
- 18 - Ad ogni effetto legale e per qualsiasi controversia derivante dal rapporto, le parti eleggono come Foro competente quello di Treviso.

- 1 -** Goods travel at the customer's risk even if sold carriage paid.
- 2 -** If the goods delivered do not correspond to the order or have faults or defects, this must be notified in writing by registered letter within 8 days from the date of delivery of the goods or within 8 days from the date the hidden defects are discovered. In the latter case no complaint shall be accepted after 2 years from the date of delivery of the goods. Any damage probably occurred during the transport must be highlighted on the transport document at the time of delivery.
- 3 -** Delivery terms are indicative and not binding on the Supplier. No direct or indirect damage may be claimed for cancelled or delayed deliveries.
- 4 -** The goods confirmed and ordered can no longer be deleted and/or rejected upon delivery.
- 5 -** It's within the company's discretion to accept and develop the request of offer.
- 6 -** Correspondence with the samples, both in case of first supply and of goods bought at subsequent dates, may not be exact, as there might be slight differences with respect to colours, materials, and dimensions.
- 7 -** Warranty applies exclusively to products manufactured entirely by the Supplier. No liability shall be accepted for damage caused by wrong or incorrect installation, wrong installation and operation of the power, gas and water systems or damage and faults caused by electric appliances, for which the customer shall refer to the relevant manufacturer's warranty.
- 8 -** Appliances and accessories supplied shall reflect the samples as much as possible. In order to guarantee delivery of the order, the company may have to purchase appliances and accessories from other Suppliers, therefore these products may look different from the samples although there will be no substantial differences in terms of quality and performance.
- 9 -** Products may be returned only if authorised by SIGI s.r.l.. If returns are authorized, the original purchase price shall be credited. Any component that has lost value or has been damaged by the customer shall be charged to the customer.
- 10 -** Payments may not be suspended, even in case of complaints. In case of delayed payments of even one instalment the Supplier shall be authorised to demand payment in full plus arrears at the current interest rate and any related bank charge. In addition, no new order will be delivered until all unpaid invoices are settled.
- 11 -** All goods delivered remain property of the Supplier until full payment is received. The Supplier shall be entitled to repossess the goods if full payment is not received.
- 12 -** Payments may only be made directly to the Supplier or to a designated person having the relevant authorisation.
- 13 -** Orders for made-to-measure goods shall be considered only if made in writing and accompanied by a clear drawing of the finished product, and their feasibility shall be assessed before acceptance.
The cost of made-to-measure goods shall be calculated at the end of the manufacturing process. It is agreed that made-to-measure goods may not be returned.
- 14 -** SIGI srl is relieved of any liability for damage caused to goods or persons, by incorrect installation of its products carried out by third parties
- 15 -** The Supplier shall have no liability in case of printing errors or wrong indications concerning non-substantial characteristics of the products.
- 16 -** SIGI s.r.l. reserves the right to modify the technical/construction characteristics of the products and combinations shown in this price list without notice.
- 17 -** All prices in this price list are in Euros, excl. VAT.
- 18 -** In case of any dispute, competent court shall be the Court of Treviso.

- 1 -** Les biens voyagent aux risques et périls de l'acheteur, même s'ils ont été vendus franco de port.
- 2 -** Toute discordance entre la livraison et la commande, tout vice ou défaut constaté dans les produits livrés, doit être signalé par écrit et par pli recommandé dans les 8 jours à dater de la livraison de la marchandise ou, dans tous les cas, dans les 8 jours à dater de la découverte de vices cachés; dans ce cas, les contestations ne pourront être acceptées si 2 ans se sont écoulés depuis la date de livraison. Les éventuels dommages imputables au transport devront être indiqués sur le document de transport au moment de la livraison.
- 3 -** Les délais de livraison indiqués par le Fournisseur ont une valeur purement indicative et non contraignante. Aucun dommage direct ou indirect ne pourra être réclamé en cas de livraison manquée ou retardée.
- 4 -** La marchandise commandée ne peut plus être annulée et/ou refusée à la livraison.
- 5 -** Il est faculté de l'entreprise d'accepter et de traiter la demande de chiffrage.
- 6 -** La conformité à l'échantillon, qu'il s'agisse de la première livraison ou des suivantes, ne doit pas s'entendre stricto sensu: des marges de tolérance peuvent exister pour les couleurs, les matériaux ou les dimensions.
- 7 -** La garantie est limitée aux seuls produits intégralement fabriqués par le Fournisseur, qui décline toute responsabilité dans tous les autres cas tels que: installation mauvaise ou incorrecte, dommages causés par le mauvais placement ou le fonctionnement incorrect d'installations électriques, hydrauliques ou au gaz; défauts et dommages causés par des appareils électroménagers, contre lesquels le Client fera valoir les certificats de garantie auprès des constructeurs.
- 8 -** Les appareils ou les accessoires utilisés dans les fournitures seront, autant que possible, conformes aux modèles. Si, pour garantir l'approvisionnement, la société était contrainte de conseiller d'autres Fournisseurs pour l'achat de certains composants, ces derniers pourraient être différents, mais leur degré de qualité et de fonctionnalité sera en substance respecté.
- 9 -** Les rendus ne seront acceptés que sur autorisation de la firme SIGI s.r.l. Les rendus acceptés par le constructeur seront crédités au prix payé lors de l'achat tel qu'indiqué sur la facture, diminué de la valeur des pièces dévalorisées ou endommagées par le client.
- 10 -** Les paiements ne pourront être suspendus, même en cas de contestation. Tout retard de paiement, fût-il d'un seul versement, autorise le Fournisseur à réclamer le paiement intégral, majoré des intérêts de retard calculés selon les taux bancaires en vigueur, des frais bancaires et des frais de gestion des sommes impayées. En outre, aucune commande ne sera honorée avant le règlement total du solde.
- 11 -** La marchandise livrée reste la propriété du Fournisseur jusqu'au paiement total de la part du Client.
Le Fournisseur a en outre la faculté de reprendre la marchandise en cas de non paiement de la somme totale.
- 12 -** Seuls les versements effectués directement auprès du Fournisseur ou d'un de ses représentants dûment mandaté seront considérés valables.
- 13 -** Les éléments sur mesure éventuels ne seront pris en considération que sur commande écrite, accompagnée d'un schéma de réalisation clair, et seront étudiés avant d'être acceptés.
Leur coût sera calculé au terme de la fabrication. La société SIGI s.r.l. n'acceptera aucun rendu des éléments sur mesure.
- 14 -** SIGI s.r.l. est exonérée de toute responsabilité, pour les dommages causés aux choses ou aux personnes, par des erreurs d'installation de ses produits effectués par des tiers.
- 15 -** Le Fournisseur décline toute responsabilité dans le cas d'éventuelles erreurs d'impression ou d'indications erronées concernant des caractéristiques non essentielles du produit.
- 16 -** Les parties élisent le Tribunal de Trévise comme Siège compétent pour le règlement de tout litige ou de toute controverse pouvant dériver de la transaction.
- 17 -** Les prix de ce tarif son exprimés en Euro, hors TVA.
- 18 -** La société se réserve le droit d'éventuellement apporter, sans préavis, des modifications techniques ou de construction au produit et aux compositions présentées.
